

## VESTRY MINUTES SUMMARY

At its meeting of April 13, 2015, in addition to reviewing and receiving the minutes, financial summaries, and reports, the vestry heard discussed the progress of the building decision. They reviewed a project analysis prepared by a vestry member, and received an update on the Harris House Working Group's progress regarding the selection of an architectural firm. The group will be interviewing general contractors and making a recommendation to the vestry. The general contractor, will then propose an architect, one that has some experience working with a church. The process will involve direct input from the parish to the architects in order to compile needs and priorities for a new building. With more specific design information in hand, the vestry will need to make a decision to either rebuild Harris House, or bring our existing structure up to code.
